Bus Station

Modular system seat made in APPRYL 3060 MN5 polypropylene with anti-static copolymer. Optionally, two upholstered complements can be attached independently to the seat and backrest. Structure composed by two rectangular tubes with section 60 x 20 x 2 mm. in cold-laminated steel, united by crossbars and elements for its attaching to the 5 mm. stamped plate supports in the extremes to insure its rigidity. With anti-corrosive epoxy kind paint. Legs made in cast aluminium and finished anodized in its fore side (**mod. 9000**) and another option in founded iron (**mod. 8000**) painted in epoxy with 100 micron thickness.

9000 Series
